

Customize Product Images On Your Website

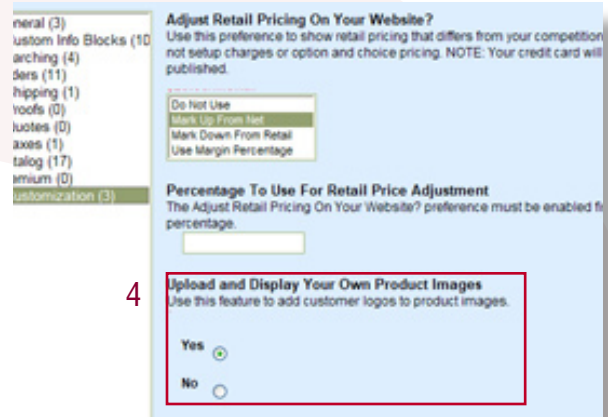

DistributorCentral offers you, as a distributor, the capability to use your own images to represent products in any catalog of suppliers' products that you create on your website.

This will allow you to create a catalog for your website, download the suppliers' images, edit those those images and then upload them again to the catalog.

This is a great feature for those distributors who would like to customize their website to certain customers or themes. This is considered a Premium Feature and there is a charge to use it. You will be charged monthly per website that you modify images for.

Follow these steps to get this setup in your account:

- 1 Once logged into your account, go to **Account tab > Preferences > Website Preferences**
- 2 Now choose which website that you would like to use this feature for (this is a per website charge)
- 3 From the left column, go to the **Customization** section
- 4 Here you will see all of the Premium features that we offer. Select **Yes** below the section titled **"Upload and Display Your Own Product Images"**
- 5 Now Create your catalog or catalogs of products that you would like to add your own images to represent. Add this under your **Products Menu > Manage My Catalogs**
- 6 Add the catalog(s) to your website.
- 7 Now Download the images from the **Products tab** in the **Content library** of your website. To get there follow these steps:
 - a Go to **Websites Menu > Add/Edit Websites**
 - b Click on **Edit** to the right of your website
 - c Go to **Content Libraries**
 - d Click on the **Products** tab.
- 8 Click on the **Bulk** link on the right side of the Products tab

- 9 Now you can download Supplier Product Images from any catalog on your website.
- 10 When you have modified your images you can upload them again to this same page under the section titled **"Upload Your Own Images."**

Please note that you must upload your images with the same file names that you downloaded them with, this is how our system identifies which image should match which product.
- 11 Now when you are ready go to **Website Publisher** and **Publish New Changes**. This will make your images live on your site. This will also begin your billing cycle on your Credit Card.
